AI ANALYSIS & REASONING

Verdict: This domain, google.com, is assessed as legitimate and benign.

Evidence: The primary evidence supporting this verdict is the VirusTotal scan, showing 0 out of 91 vendors flagged any malicious activity or reputation issues. While other threat intelligence scores were unavailable, the overwhelmingly clean VirusTotal result for such a widely used and trusted domain strongly indicates no active threat.

Recommended Action: No immediate action is required regarding the domain itself, and this alert can be closed as a false positive or benign activity.
