VERDICT: SAFE RISK

THREAT INTELLIGENCE FUSION

Source	Finding	Status
ChatSecOps AI	Behavioral Risk Score: 0.0%	SAFE
VirusTotal	16 security vendors flagged	MALICIOUS
AbuseIPDB	Confidence: 0%	LOW
AlienVault OTX	No data / Error	N/A
Shodan	IP Address not found/resolved	SKIPPED

AI ANALYSIS & REASONING

The verdict on the domain kgm-ogd.com is that it is likely malicious, given the significant number of vendors flagging it on VirusTotal, despite low to no risk indicators from other sources. The evidence supporting this verdict includes the fact that 16 out of 91 vendors on VirusTotal have flagged the domain, which suggests a potential threat, although the low AbuseIPDB Confidence and ML Risk Score may indicate a false positive or a newly emerging threat. Based on this analysis, the recommended action is to block or closely monitor traffic to and from kgm-ogd.com, and to conduct further investigation to determine the nature and scope of the potential threat, including reviewing system logs and network traffic for any signs of malicious activity.
