AI ANALYSIS & REASONING

Verdict: The domain `ezpay.today` currently presents a very low immediate security risk based on the provided threat intelligence.

Evidence: This assessment is supported by its extremely low VirusTotal detection rate (1/91 vendors flagged), a 0% AbuseIPDB confidence score, and a 0.00% ML risk score. These metrics collectively indicate that the associated IP (104.21.89.200) is not widely reported for abuse or classified as high-risk by automated systems.

Recommended Action: No immediate action, such as blocking, is required. However, due to the domain's payment-related name, it should be added to a watchlist for ongoing monitoring for any future changes in threat intelligence or suspicious activity that might indicate a potential for phishing or brand impersonation.
